

---

OK it is now time for a break, have a mince pie or sausage roll. Hopefully you have brought your own drinks and maybe something else to eat. My colleague will add up the scores to date.

BUT do not let your brains go to sleep because this is your chance to earn 20 more points.

There are 50 STATES in the USA. THIRTY TWO of these end in a vowel.

All you have to do is name the EIGHTEEN states that end in a constant and also the CAPITAL or LARGEST city in that state. The capital city is not always the largest.

Half point for the state and half point for the largest or capital city. This will earn you 18 points.

For your other two points name the first and last states Alphabetically that end in a vowel and their largest or capital city.
